

Our shared biosecurity narrative

YES, OF COURSE. SHOWERS ARE A KEY POINT FOR THE BIOSECURITY ON FARMS, BUT... SHOWERS FOR THE STAFF!

PERE ROCA 2019

Table discussion

What sort of resources would support you in promoting/championing biosecurity?

What sort of information/ resources are your members/stakeholder seeking?

Are there any biosecurity campaigns/taglines/messaging that you have seen that have had a strong impact?

Partners Update

Queensland Biosecurity Partners Network

Follow Project

About the Network

The Queensland Biosecurity Partners Network is an online consultation platform designed to support engagement with our partners who participate in the annual Queensland Biosecurity Partners Forum.

This platform will provide key information and host consultations on a range of initiatives, including the *Queensland Biosecurity Strategy 2024-2029*

We will send a quarterly Partners Update, which will provide links to the Network to access key information, documents that aren't publicly/widely available and opportunities for you

to have your say and shape the future direction of biosecurity in our state.

As a subscriber to the Network we welcome your valuable feedback - leave a comment in the chat or drop us a line on biosecurity.capability@daf.qld.gov.au.
